

Addition of two numbers:

- ☐ Check the two input fields for numbers that take only numeric value
- ☐ Check the sum field displays only numeric value
- ☐ Check whether the addition operation can be appropriately done by taking a different combination of inputs. For example: taking a negative and positive number, float numbers
- ☐ Check whether the users can see the message for providing inputs or not
- ☐ In case of float numbers check upto what decimal points can be entered as inputs
- ☐ For the addition of float numbers check upto what decimals points are displayed as sum
